

COZIKIDS

Cozikids Limited has designed a unique concept to assist younger age groups with specialized and mobility chairs.

Following consultations with Professional child care organisations and Occupational Therapists, Cozikids has identified the primary care comfort needs for infants with a variety of healthcare requirements.

The chairs have been designed to provide a high degree of comfort and relaxation when a child is safe and free from discomfort for lengthy periods allowing carers, nurses and families to share a more relaxed and homely environment.

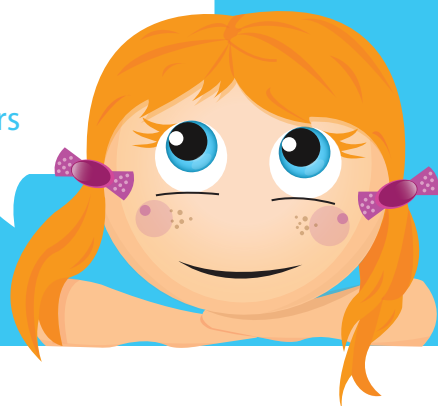

The chairs are available as a manual push action, single motor recline only or single motor rise and recline and are made to measure. The chairs have been designed to give adjustability so that as the child grows so does the chair!!

With our Unique designs and technology you are able to alter the depth and width of the chair as the child develops, thus getting the maximum use out of the chair and saving ££££'s on replacements.

We also provide these Optional extras:

- Drip Stand Facilities • Postural Seating Management
- Removable and Replaceable Covers • Push Handles
- Communication Aid • Sensory Aids • Locking Castors
